

Waupaca Online does not officially support Netflix, Hulu or other video streaming services on our internet service. Many users have had luck using them. Although we do not support it, here are a few tips to have the best experience with it.

Netflix

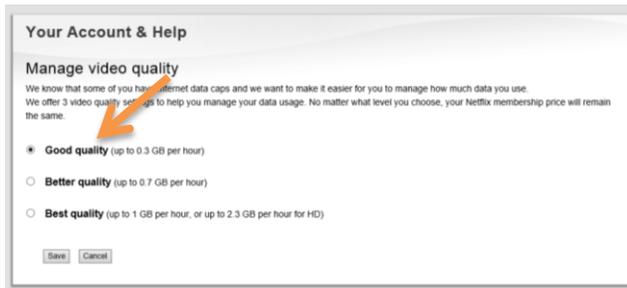

1. Login to your Netflix Account. Click on **Your Account**.

2. Click on **Manage Video Quality**.

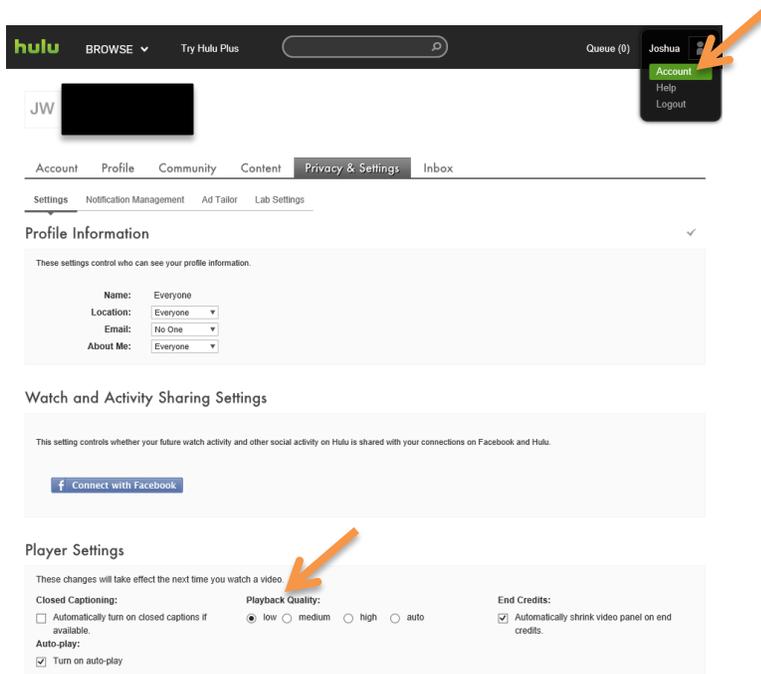

3. Select **Good Quality**

These tips will help you get the best experience possible with Netflix. We've found that the "Good Quality" setting still provides a good viewing experience.

Hulu

1. Login to your account
2. Select **Account**
3. Set **Playback Quality** to “low”

Crackle

While watching a movie or program on Crackle change the quality setting to **360p**.
